

Left: Lamb expert Damian Drum is pictured with owners Jock and Riley McGregor, Marnoo, Victoria, discusses the \$4:50 for 20kg dressed weight and over on offer for forward contracted merinos lambs to Catricums in Melbourne.

*Above: The simple straw bale structure works by using force from the lambs as they eat which keeps the front and back sides of the structure hard up against the bale until the bales is finished.
Left: Shade and shelter is very important but these lambs don't mind the taste as well.*
